Technical Characteristics S1000

stendidea® is supplied by 220V - 50 Hz voltage line. Max absorbed power 270 W | Weight: 18 Kg.

20 Kg clothes (placed on all rods) can be put on the large and sturdy rack. An additional rack can be supplied on demand.

The assembling has to be carried out near an electric socket, on an inner or atmospheric agents protected wall, on a smooth surface. It is required to use spacers, when differences of level (for instance tiles) exist. When not operating, the main rack and the additional one as well can be lowered again, so to reduce the encumbrance.

The manufacturer cannot in any case be hold responsible for accidents and/or damages due to incorrect use of the clothes hanging device. Any incorrect use of the device involves the forfeiture of the guarantee terms. Technical data are for information only and can be modified by manufacturer without any notice.
